### Education

#### Master of Science in Artificial Intelligence

Florida Atlantic University, Boca Raton, FL. Graduation date: December 2023

Cumulative GPA: 3.9

#### Bachelor of Arts in Psychology

Florida Atlantic University, Boca Raton, FL. Graduation date: May 2022

### Technical Skills

**Programming Languages:** C/C++, GLSL, HTML, Python, JavaScript, typescript

**Tools & Technologies:** Colab, Microsoft Office Suite (Word, Excel, PowerPoint), Max MSP, IDEs, Soldering, DSP, Raspberry Pi, DAWs

**Operating Systems:** Linux Ubuntu, Windows10, MacOS

### Professional Experience

#### Graduate Research Trainee, National Science Foundation at FAU | Boca Raton, FL

August 2022 – Present Day

*Engaged in research, design and development for detection of ocular disease using CNNs and retinal photography.*

- Developed, and tested software for detecting ocular diseases with deep learning and medical images using Tensorflow.
- Collaborated with professors and other graduate students on performing research and designing experiments.
- Implemented a framework for a web based audio-visual solution.

#### Production & Development (Internship), Vector Climate | Pompano, FL

May 2022 – August 2022

*Worked with Vector Climate Labs to produce and develop the companies advanced mobile cooling systems.*

- Production and fabrication of the company's flagship products, the Vector and Spartan for industrial outdoor climate control.
- Collaborated with cross-functional teams for timely production and assembled PCB prototypes.

#### PCB Design & Assembly, Steven Leone; PE LLC | Lake Worth, FL

September 2020 – Present Day

*Responsible for PCB assembly duties involving prototyping, unit test and functional test assigned by Project Manager.*

- Practiced standardized procedures for following schematics, spec and BOM sheets, which leads to efficient production of clients designs for timely product releases.
- Engaged in onsite coordination, progress, planning, closeout, & quality control to add support to project development.
- Soldering SMT and Thru Hole components on: PCBs, IC's, microcontrollers, power electronics, FETs, diodes and resistors. Sizes included 0402, 0603, 0805 SMT resistors, capacitors, diodes, ESD components.

#### Consumer Electronics Repair, uBreakiFix | Royal Palm, FL

October 2021 – May 2022

*Responsible for processing customers electronics and diagnosing issues related to the device. Worked with co-workers to accommodate customers with fast turnarounds for electronic repairs.*

- Diagnosed device issues, managed inventory, and repaired a range of electronic devices.

### Relevant Projects

#### Object Detection System on Social Media | Deep Learning

December 2022

*The goal of this project was to implement Convolutional Neural Network for detection of opiate related activity on Instagram.*

- Designed a Convolutional Neural Network (CNN) leveraging computer vision techniques. Used web scraping post-training to analyze a vast number of images across the platform.
- Worked closely with professors and colleagues to research, design, and systematize the detection mechanism.
- The research findings are pending publication, aiming to provide insights into online drug-related activities, This potentially aids law enforcement agencies.

#### Web Based Audio-visual Platform | Web Audio & Graphics

August 2022

- Designed, built and tested CRUD web platform for my immersive art based side project. Including frameworks like Next.js, React, Chakra UI, Firebase, P5.js, RNBO.js and web audio. Repo: <https://github.com/jacklion710/jacklions-website>  
Site: <https://jacklion.xyz>
- Integration between RNBO.js, web audio and p5.js for an interactive web based experience involving interactive audio and visual elements on a web browser.
- Created an innovative & responsive UI using typescript for user friendly web based audio-visual experiences.

#### MIDI Delay Plugin Development | Audio Development

July 2021

*Developed a unique algorithm for delaying signals in real-time using circular buffers as a function of a tuned MIDI note input in Max MSP.*

- Built a plugin for use in electronic music production.
- Implementation of user feedback before a product release.
- Published devices online on gumroad: <https://jacklion.gumroad.com/l/tunedelay?layout=profile>

### Relevant Coursework

#### Python

Natural Language Processing

Artificial Intelligence

C Programming

Computational Foundations of AI

#### Data Structures

Advanced Internet Systems

Software Engineering

Cognition

Analysis of Algorithms

#### Deep Learning

Data Science

AI in Medicine & Healthcare

Typescript
